

CAREER NEWS

February, 2020

As this is the first Careers Newsletter of the year, I would like to introduce myself to Year 11 students and remind Year 12 students of the services that I am able to provide to students and their families. My aim is to work with individual students to create an Independent Transition Plan (ITP). This is a flexible plan that takes into account the areas of strengths for students and identifies suitable options for further study, employment or apprenticeships. As our students are facing an increasingly chaotic world with a changing nature of the workplace, it is important they use their time at school to explore possibilities for them as they transition past secondary education. In addition to this, a newsletter will be sent to parents and students twice per term. I have encouraged students to read this newsletter to be informed of everything in the area of careers and further study.

At the end of last year, we received pleasing news that Maya Hill was the winner of the Bright Awards (by Torrens University). The Bright Awards celebrate creativity and craft within secondary schools in **Australia and highlight emerging young talent**. Maya will receive \$1,000 and our College will receive \$3,000. To view Maya's design visit the website below (Maya Hill - Repurposed Purchase).

University of Tasmania (Sydney Campus)

Experience in 2020 a week as a Marine Biologists - UTAS Marine Discovery Scholarship

This predominately field-based unit consists of 5 days on picturesque Maria Island on the Tasmanian East Coast. The unit is open to 24 students and is designed to engage, challenge, excite and inspire you through a hands-on marine science program. It will encourage you to explore issues threatening biodiversity as well as the productivity of the marine system. Climate change, invasive species, pollution, debris and their associated social and economic impacts will be covered. Apply here:
